Professional Summary

Full Stack Developer with 1+ year of hands-on experience building enterprise-grade web applications using MERN and MEAN technologies. Developed 40+ RESTful APIs, implemented JWT Authentication, Role-Based Access Control (RBAC), workflow automation, and optimized backend performance by up to 45%. Experienced in Angular, React.js, Node.js, NestJS, MongoDB, and MySQL. Passionate about clean architecture, scalable backend systems, and high-quality software development.

Technical Skills

Languages: JavaScript, TypeScript, Python
Frontend: Angular, React.js, Next.js, HTML5, CSS3, Bootstrap, Ionic, Redux Toolkit, RxJS
Backend: Node.js, Express.js, NestJS, RESTful APIs
Database: MongoDB, MySQL
Security: JWT, RBAC
Tools: Git, GitHub, Postman, VS Code
Concepts: MVC, API Integration, Performance Optimization, Agile

Professional Experience

MERN & MEAN Stack Developer | Pybritech Technologies | June 2025 – Present

- Developed enterprise web applications using Angular, React.js, Node.js, Express.js, NestJS, and MongoDB.
- Designed and implemented 40+ RESTful APIs for authentication, workflow automation, user management, document management, and payment processing.
- Implemented JWT Authentication and RBAC.
- Improved backend performance by 45% and frontend performance by 35%.
- Reduced production bug resolution time by 60% through debugging and optimization.
- Collaborated in Agile sprints using Git and code reviews.

Projects

PixelDocs – Multi-Tenant Workflow Automation Platform

Description: Enterprise SaaS platform for document management, dynamic forms, payment processing, workflow automation, and role-based portals.

Responsibilities: Built backend APIs, implemented JWT/RBAC, integrated Razorpay, optimized MongoDB queries, collaborated with Angular frontend.

Tech: Angular, Ionic, NestJS, Node.js, MongoDB, JWT, RxJS, Razorpay, AWS.

Annapurna Food – Restaurant Management System

Description: Full-stack food ordering and restaurant management platform with admin dashboard, cart, orders, payments, and user authentication.

Responsibilities: Developed REST APIs, JWT authentication, payment integration, responsive UI, and database optimization.

Tech: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Razorpay.

Zerodha Marketing Platform

Description: Lead-generation and marketing platform inspired by Zerodha's clean UI for

customer inquiry and authentication management.

Responsibilities: Built responsive UI, authentication APIs, reusable components, and backend integration.

Tech: React.js, Node.js, Express.js, MongoDB, Bootstrap.

Achievements

- Developed 40+ production-ready REST APIs.
- Improved backend response time by 45%.
- Improved frontend performance by 35%.
- Reduced production issue resolution time by 60%.

Education

Bachelor of Technology (Computer Science & Engineering)

Adina Institute of Science and Technology (2021-2025) | CGPA: 7.25
